

【Alex Fong becomes Water-Saving Ambassador】

English subtitles

- Water Save Dave: Why do you want to become a “Water-Saving Ambassador”?
- Alex Fong: Because you teased me before and called me “Waster Fong”. I know wasting water is bad! I don’t like this nickname. I will teach people how to conserve water.
- Water Save Dave : So how can we conserve water?
- Alex Fong : Water is needed for the production of consumables. For example, producing 1kg of beef or a pair of jeans consumes over 10,000 litres of water. Therefore, we should think twice before purchase. Take a shorter shower. Do not wash dishes under a running tap. Install flow controller for the tap to save more water!
- Alex Fong & Water Save Dave : Let’s visit Water Supplies Department website and learn to save water!
